SUMMARY

Senior QA Expert | Triple ISTQB Advanced Level Certified | 8+ Years Experience Pioneer in AI-driven Quality Engineering, specializing in architecting context-aware agents that automate test case generation using advanced LLMs and MCP (Model Context Protocol). Expert in streamlining QA lifecycles, previously boosting automation velocity at Siemens by 50%. Proficient in full-stack validation (REST APIs, SQL, CI/CD) with a strategic focus on LLM orchestration to enhance product reliability.

EXPERIENCE

SIEMENS Foundational Technologies, **Software Development Engineer in Test (SDET)**

Feb 2022 - Present

- **AI-Driven Quality Transformation:** Engineered a context-aware AI agent utilizing LLMs and MCP to index backend architectures; automated manual test case generation, resulting in a 50% increase in automation development speed
- **Intelligent Orchestration:** Architected a JIRA-Git orchestration layer using advanced LLMs to generate test content from user stories and commits, achieving an 80% gain in efficiency and eliminating documentation debt.
- **Scale & Performance:** Developed and optimized scalable Python-based automation frameworks for large-scale applications, integrating functional, regression, and performance testing into the SDLC.
- **DevOps & CI/CD Integration:** Streamlined the QA lifecycle by integrating automated tools into Jenkins and GitLab pipelines, boosting overall team productivity by 20%.
- **Full-Stack Validation:** Executed complex E2E and API testing (Postman, SoapUI) and managed data integrity through advanced SQL CRUD operations and database validation.
- **Utilized SQL** to query test databases, validate data integrity, and perform CRUD operations for test setup and validation.
- **Security & Compliance:** Conducted API-based security trimming and role-based access control (RBAC) tests to ensure robust endpoint security.

Turkish Aerospace Industry (TAI/TUSAŞ), **Software Test Engineer & UAV Pilot**

Jun 2017 - Feb 2022

- **Safety-Critical QA:** Managed end-to-end QA processes for in-house defense systems, ensuring rigorous test documentation and reporting for high-stakes aerospace projects.
- **Automation & Stability:** Developed and maintained automated test scripts for flight software, significantly increasing application stability and stakeholder confidence through high-quality delivery.
- **Cross-Functional Collaboration:** Partnered with flight secondary and software development teams to identify, track, and resolve critical defects, ensuring timely deployment of stable defense solutions.

EDUCATION / PUBLICATIONS & RESEARCH

• Gazi University Bachelor's Degree • **Computer Engineering** • Aug 2013 - Jun 2017

• "Bridging the Gap: An Agentic AI Framework for Reverse-Engineering Automated Test Scripts into Natural Language Requirements" – (Accepted) 4th Cognitive Models and Artificial Intelligence Conference (Prague, 2026).

Summary: Comparative analysis of 3 LLM models in recovering structured test cases from 300+ industrial automated python scripts, effectively solving the documentation debt problem.

LICENSES & CERTIFICATIONS

ISTQB Advanced Level – **Technical Test Analyst**

ISTQB Advanced Level – **Test Manager**

ISTQB Advanced Level – **Test Automation Engineer**

SKILLS

AI & Modern QA: AI Agent Orchestration | LLM Integration | MCP (Model Context Protocol) | Prompt Engineering | Automated Documentation

Test Automation & Tools: Python | Selenium | TestComplete | API Testing (Postman, SoapUI) | JMeter | Playwright | BDD (Gherkin)

DevOps & Infrastructure: CI/CD (Jenkins, GitLab) | JIRA API | SQL (CRUD & Validation) | AWS Basics | Bug Tracking | Linux
